RE: WORKSHOP EVALUATION

Please answer the following questions and return answers as soon as you conveniently can. Your answers will be used both in planning future workshop and as part of our report to NSF. So, the more information you provide, the better.

You might want to ***use your notebook's daily schedules to refresh your memory***. If you need more space than I've allowed, attach an additional page or do the entire evaluation on your own paper. (Since I'll be xeroxing these for NSF, you may omit your name if you wish to be anonymous for that purpose but send along a name card so that I can tell who has not yet responded.) Thanks.

1. What did you want to get from the workshop? Did you get it?

2. Which presentations helped most? How? (Please be specific.)

3. Were there any presentations that could be eliminated (or substantially reduced)? If yes, please explain.

4. Which readings helped most? How? (Please be specific.)

5. Were there any readings that could be eliminated (or substantially reduced)? If yes, please explain.

6. Was there anything the workshop did not include that it should have? Any topics it should have given more emphasis?

7. Was the schedule all right? Or would you have preferred whole day sessions rather than half days? Or would you have preferred spreading the sessions out over more of the summer or bunching them together more?

8. Are you going to try to integrate ethics into technical courses in ways you would not have tried before? Explain. Do you feel ready?

9. Any questions I should have asked and didn't? Anything else you would like to say about the workshop, the presenters, the participants, or the questions on this questionnaire?
